PROFESSIONAL SUMMARY

Senior Data Scientist with 6.3+ years of experience building intelligent systems and ML solutions for procurement, e-commerce, and risk assessment domains. Specialized in RAG systems, agent orchestration, and generative AI applications using LangGraph, LangSmith, and Vertex AI, bridging the gap between cutting-edge research and practical industry applications.

EXPERIENCE

Senior Data Scientist

Feb. 2025 – Present

Jaggaer

Hyderabad, India

- **Built multi-agent orchestration** with LangSmith and LangGraph for the procurement domain, routing user requests across agent nodes and integrating GitHub CI/CD for pipeline automation
- Led multi-agent orchestration for ticketing tool workflows combining deterministic Python pipelines (order status, cancel-order, unified leadership/CSR report bundles) with Claude Agent SDK triage
- Implemented a **RAG pipeline** where agents retrieve and rank document chunks from Google Cloud Storage, reply to users via orchestrated nodes, and are evaluated with RAGAs and DeepEval on Faithfulness, Answer Relevancy, and Contextual Precision/Recall
- Built a production **MCP tool layer** for a 3PL logistics client
- Architected a no-code automation workflow using n8n platform with REST API integration and event-driven email triggers for streamlined data processing pipelines
- Developed an intelligent conversational agent leveraging Google Vertex AI platform for automated ticket booking functionality and e-commerce order management with natural language processing capabilities
- Engineered a multilingual video localization system with automated translation capabilities for English-to-Italian, French, and Spanish conversion, implementing synchronized audio dubbing and subtitle generation
- Built a real-time cost analytics dashboard using Streamlit framework integrated with AWS Cost Explorer API to monitor resource utilization and expenditure metrics for generative AI applications

Data Scientist

Oct. 2022 – Nov. 2024

RapidCanvas

Hyderabad, India

- Designed and implemented a content-based recommendation system utilizing natural language processing and collaborative filtering techniques to deliver personalized book recommendations, enhancing customer engagement.
- Leveraged advanced statistical modeling techniques and data mining algorithms to construct a comprehensive credit risk assessment framework, enabling precise customer segmentation and informed decision-making for risk mitigation strategies.
- Implemented robust feature engineering pipelines for structured and unstructured data, improving **model accuracy by 35% through** advanced preprocessing techniques.
- Demonstrated proficiency in leveraging the Shopify platform, integrating machine learning models to build prediction services, and seamlessly writing back data to Shopify databases.
- Developed containerized machine learning applications using Docker, implementing CI/CD workflows for seamless model deployment and tracking.
- Conducted in-depth sales data analysis to uncover valuable insights, identifying customer behavior patterns and opportunities for targeted marketing campaigns.

Data Scientist

Jun. 2021 – Oct. 2022

Eaton

Pune, India

- Designed and deployed scalable machine learning pipelines using AWS SageMaker and Python, improving predictive model performance and **reducing processing time by 40%**.
- Conducted advanced customer segmentation using sophisticated clustering algorithms, providing data-driven insights to business stakeholders.
- Built automated ETL processes and data transformation scripts to streamline complex data workflows, focusing on data quality and platform efficiency.
- Performed comprehensive data visualization and published results on dashboards for stakeholder analysis.

Assistant System Engineer

Mar. 2018 – Jul. 2019

Tata Consultancy Services

Noida, India

- Developed sophisticated fraud detection systems using advanced machine learning techniques in the Fintech domain, demonstrating expertise in anomaly detection, optimization, and flagging fraudulent server transactions.
- Collaborated with cross-functional teams to streamline business requirement processes and set actionable client expectations on deliverables.

Data Scientist (Intern)

Aug. 2020 – May 2021

PowerSchool

Bengaluru, India

- Leveraged advanced statistical methods including t-tests, ANOVA, and machine learning models such as logistic regression and random forests to cluster students based on their academic performance, enabling personalized learning approaches.
- Developed and implemented robust analytical models and algorithms to identify patterns, trends, and key factors influencing student achievement, providing valuable recommendations for targeted interventions.
- Implemented complex feature engineering techniques to extract meaningful insights from large-scale educational datasets.

PROJECTS

Large Language Model: Customer Interaction Analyzer | *Python, Hugging Face, Docker, AWS*

2024

- Developed a sophisticated LLM-powered system for analyzing customer interaction data using advanced NLP techniques.
- Implemented fine-tuning strategies on pre-trained transformer models to improve sentiment and intent detection.
- Created scalable microservices architecture using Docker for model deployment and containerization.

AI-Powered Resume Matching System | *Python, LLMs, AWS S3, Git CI/CD*

2023

- Engineered an intelligent resume screening system using Large Language Models and prompt engineering to automate candidate-job role matching, significantly reducing HR processing time.
- Implemented a scalable document storage solution using AWS S3 for efficient resume management and retrieval.
- Developed a sophisticated scoring algorithm providing percentage-based matching and skill level assessment, improving hiring accuracy by 40%.

TECHNICAL SKILLS

Agent Frameworks & LLM Ops: LangGraph, LangSmith, RAGAs, DeepEval, Vector Databases (Pinecone)

Machine Learning Frameworks: TensorFlow, PyTorch, Hugging Face, Scikit-learn, NLTK

Programming & Cloud: Python, Docker, AWS SageMaker, AWS S3, Google Cloud Storage, Git Workflows, CI/CD

Data Processing & Analysis: Pandas, NumPy, PySpark, SQL, MySQL, ETL Pipelines

Data Visualization & Orchestration: Streamlit, n8n, Google Vertex AI

Soft Skills: ML System Design, Pipeline Optimization, Technical Mentorship, Storytelling, Business Acumen

EDUCATION

Vellore Institute of Technology

Vellore, India

Master's in Big Data Analytics, Gold Medalist

2019 – 2021

- Advanced Coursework: Machine Learning, Deep Learning, Advanced NLP, Distributed Computing, Data Analytics, Statistical Modeling

BBD University

Lucknow, India

Bachelor of Computer Science

2013 – 2017
